Preparing Your Images for a LensWork Submission

Horizontal images should be 2800 pixels wide

Vertical images should be 2800 pixels wide

Image file specifics

- RGB images are preferred, grayscale is acceptable
- Color space should be Adobe RGB (1998)

- First generation JPG files saved to maximum quality are preferred
- Photoshop PSD files, TIF files are acceptable

- Please include titles, captions, or text you would like us to use in the metadata of the image.

- Images should be 2800 pixels on the long side and the short side whatever is necessary for your image aspect ratio
- The “DPI” or “PPI” resolution is irrelevant as long as your images are 2800 pixels on the long side. We will adjust the DPI for the output of our various publications as needed.
